WELCOME INTRODUCTION

Dear EDULEARN10 participants,

First of all, we wish to express our deepest thanks to all people who have contributed to this second EDULEARN edition. It's a real pleasure to count with the participation and contribution from more than 550 delegates coming from more than 65 different countries.

This fact itself makes EDULEARN10 an international meeting point for those who wish to share their experiences and results in the area of education and new learning technologies.

The previous working year has been hard, but all these efforts have been worth just by looking at the enthusiasm and motivation of all academics, researchers and professionals involved in this annual forum. The richness of the topics and contributions presented in this conference has been able to present an intense and attractive programme that will promote discussion and the exchange of ideas.

The different ways of applying new educational technologies in the different countries will surely make you broaden your vision about education and the possibilities to implement new ways of teaching and learning.

We hope you take EDULEARN10 as an opportunity to exchange ideas and results, to discover new trends in education and to listen to other projects and experiences that will surely arise from the contents of this conference.

In addition, the conference is held in a unique city that will make your stay unforgettable. Barcelona is world know for its attractive places to visit, its own architecture style, cultural heritage and typical gastronomy. For sure, it will not disappoint you.

Thank you very much for coming to share your experiences with us! We hope that you enjoy your time in EDULEARN10.
